

**Inter-Graduate School Program for
Sustainable Development and Survivable Societies**

Interdisciplinary Seminar (1 session course)
[#44-(1)]

Health behavior

By: Professor Mitchell D. Feldman
(Professor of Medicine, Chief, Division of General Internal
Medicine, Associate Vice Provost, School of Medicine,
University of California, San Francisco)

Date: March 7 (Tue), 2017 13:00-14:30

**Venue: Seminar room, Department of Global Health and Socio-
epidemiology, Graduate School of Medicine**

<Summary>

This seminar will review the importance of social and behavioral factors in global health. We will review the concept of behavioral medicine and discuss how the global transition from acute to chronic illness has impacted the public health approach to prevention and treatment. Students will be expected to read the chapter on “Global Health” from Professor Feldman’s textbook “Behavioral Medicine: A Guide for Clinical Practice” and be prepared to discuss key concepts.

Activity type: Lecture and group discussion
